

Martin Li

Software Engineer • Full-Stack & SRE • Java • Spring Boot • React • AWS • AI/ML

Plano, TX | 914-513-4974 | simplisticmartin@gmail.com | simplisticmartin.github.io | linkedin.com/in/simplisticmartin | github.com/simplisticmartin

Summary

Software Engineer with 5+ years building and operating enterprise financial systems at JPMorgan Chase in Java, Spring Boot, microservices, React, and SQL Server on AWS. Blends full-stack delivery with SRE, application resiliency, and CI/CD to ship reliable, high-impact tools for portfolio managers and clients. Georgia Tech M.S. in Computer Science (AI/ML) and AWS Certified Cloud Practitioner.

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL, HTML/CSS

Backend: Java, Spring, Spring Boot, Moneta Boot, Microservices, REST APIs, OpenAPI/Swagger, JUnit, Mockito, Liquibase

Frontend: React, Redux, Redux-Saga, React Query, Jest, React Testing Library, ag-Grid, styled-components

Cloud & SRE: AWS, Kubernetes/GKP, Cloud Foundry/GAP, Docker, CI/CD, Jenkins, AutoSys, Linux, Bash, monitoring & alerting

Data & AI: MS SQL Server, Oracle SQL, MongoDB, Spark, scikit-learn, Jupyter, GitHub Copilot, Claude Code, Cursor

Practices: Agile/Scrum, application resiliency, application security, automated testing, responsible AI use

Experience

JPMorgan Chase & Co.

Plano, TX

Software Engineer II

Jul 2022 - Present

- Delivered full-stack fund-onboarding, due-diligence, factsheet, and portfolio-management tools in React, TypeScript, Java, Spring Boot, and SQL Server, giving 25+ portfolio managers and clients a consolidated platform for critical fund workflows.
- Own SRE, observability, and application resiliency for a portfolio of 30+ applications, implementing AutoSys monitoring and proactive alerts that detect production failures before user impact and sustain 99.9% uptime.
- Cut deployment time up to 40% by modernizing legacy services to the latest Spring Boot/Moneta Boot and containerizing delivery on Kubernetes/GKP, Cloud Foundry/GAP, AWS, and Docker with Jenkins CI/CD.
- Enabled portfolio managers to independently initialize funds, manage restrictions, and access reporting by delivering REST APIs, fund-data dashboards, and internal web applications.
- Automated fund-database setup for 10+ funds through Liquibase-managed schema changes and optimized SQL Server queries, cutting setup time by roughly 70-80% and preventing recurring onboarding errors.
- Developed reusable React and ag-Grid components with automated frontend and backend testing (Jest, RTL, JUnit, Mockito), reducing duplicated work and improving confidence in production releases.

Quicruit

Remote

Software Engineer Consultant

Dec 2021 - Jun 2022

- Modernized Java/SQL API services with OpenAPI/Swagger, stronger validation, REST improvements, CI hardening, and expanded test coverage; improved median API latency by about 30%.

Oppenheimer & Co.

New York, NY

Linux Consultant

Dec 2020 - Jun 2021

- Automated secure weekly transfers of 6-15 GB of financial data using Linux, Bash, GPG, and scheduled jobs, reducing transfer errors by 25% and supporting 99.9% data integrity.

Federal Home Loan Bank

Jersey City, NJ

Software Engineer Intern

2019

- Built a QA data-visualization dashboard that reduced outsourced reporting costs by 15% and streamlined recurring reporting workflows.

Projects

ClearSpeak — AI Speech Coach (React Native): Cross-platform mobile app with an on-device LLM (llama.rn) and speech-to-text (whisper.rn) for real-time feedback — filler detection, live coaching, and progress analytics; TypeScript, Expo, Zustand.

ML Model Optimization: Python, scikit-learn, neural networks, and randomized optimization; compared backpropagation, genetic algorithms, and MIMIC for heart-disease classification, reaching about 0.945 accuracy.

Education, Certifications & Awards

Georgia Institute of Technology — M.S., Computer Science, 2026; GPA 3.6

Coursework: Machine Learning; Artificial Intelligence; ML for Trading; Data & Visual Analytics; AI, Ethics & Society

The City College of New York — B.S., Computer Science, 2020 | **AWS Certified Cloud Practitioner** (2022)

Awards: 1st Place, Cornell Data Science Hackathon; 1st Place, Heroes vs Hackers; Best Website Hack, Columbia Health Hacks
