

Martin Li

Software Engineer • Full-Stack • Java • Spring Boot • React • AWS • AI/ML

Plano, TX | 914-513-4974 | simplisticmartin@gmail.com | simplisticmartin.github.io | linkedin.com/in/simplisticmartin | github.com/simplisticmartin

Summary

Full-stack Software Engineer with 5+ years building enterprise financial microservices in Java, Spring, Spring Boot, React, TypeScript, and SQL Server on AWS. Strong across the full software development life cycle, Agile, CI/CD, application resiliency, and security, with a track record in modernization, fund and portfolio tooling, and SRE monitoring. Georgia Tech M.S. in Computer Science (Artificial Intelligence), AWS Certified Cloud Practitioner, and a policy-aware user of AI coding assistants (GitHub Copilot, Claude Code, Cursor).

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL, Bash, HTML/CSS

Backend: Java, Spring, Spring Boot, Moneta Boot, Microservices, REST APIs, OpenAPI/Swagger, JUnit, Mockito, Liquibase

Frontend: React, Redux, Redux-Saga, React Query, Jest, React Testing Library, ag-Grid, styled-components

Cloud & SRE: AWS, Kubernetes, Cloud Foundry, Docker, CI/CD, AutoSys, Linux, monitoring & alerting

Data & AI: MS SQL Server, Oracle SQL, MongoDB, Spark, scikit-learn, Jupyter, machine learning, LLMs (llama.rn)

Practices: Agile/Scrum, CI/CD (Jenkins), application resiliency, application security, automated testing, responsible AI use

Experience

JPMorgan Chase & Co.

Plano, TX

Software Engineer II

Jul 2022 - Present

- Shipped fund-onboarding, due-diligence, and factsheet tools plus a portfolio-management toolkit used by portfolio managers and clients, built full-stack in React/TypeScript and Java/Spring Boot microservices (Moneta Boot) on Microsoft SQL Server.
- Own SRE, observability, and application resiliency for a 30+ application team portfolio, authoring AutoSys schedules and alerting that catch failures before users and safeguard release reliability across production workflows.
- Cut deployment time up to 40% by modernizing legacy services to the latest Spring Boot/Moneta Boot and containerizing delivery on Kubernetes, Cloud Foundry, AWS, and Docker with Jenkins CI/CD.
- Gave portfolio managers self-service access to fund initialization, restriction, and reporting workflows by building REST APIs, fund-data dashboards, and internal web tools.
- Accelerated onboarding of new funds with Liquibase-managed schema changes and tuned SQL Server queries, cutting manual setup and configuration errors.
- Built reusable React components and data grids (Redux/Redux-Saga, React Query, ag-Grid) with Jest, RTL, JUnit, and Mockito coverage; use AI coding assistants (Copilot, Claude Code, Cursor) within firm policy to speed refactoring, testing, and review.

Quicruit

Remote

Software Engineer Consultant

Dec 2021 - Jun 2022

- Modernized Java/SQL API services with OpenAPI/Swagger, stronger validation, REST improvements, CI hardening, and expanded test coverage; improved median API latency by about 30%.

Oppenheimer & Co.

New York, NY

Linux Consultant

Dec 2020 - Jun 2021

- Automated secure 6-15 GB weekly financial file transfers using Linux, Bash, GPG, and scheduled jobs, reducing transfer errors by 25% and supporting 99.9% data integrity.

Federal Home Loan Bank

Jersey City, NJ

Software Engineer Intern

2019

- Built a QA data-visualization dashboard that reduced outsourced reporting costs by 15% and streamlined recurring reporting workflows.

Projects

ClearSpeak — AI Speech Coach (React Native): Cross-platform mobile app with an on-device LLM (llama.rn) and speech-to-text (whisper.rn) for real-time feedback — filler detection, live coaching, and progress analytics; TypeScript, Expo, Zustand.

ML Model Optimization: Python, scikit-learn, neural networks, and randomized optimization; compared backpropagation, genetic algorithms, and MIMIC for heart-disease classification, reaching about 0.945 accuracy.

Education, Certifications & Awards

Georgia Institute of Technology — M.S., Computer Science (Artificial Intelligence), May 2026; GPA 3.6

Coursework: Machine Learning; Artificial Intelligence; ML for Trading; Data & Visual Analytics; AI, Ethics & Society

The City College of New York — B.S., Computer Science, 2020 | **AWS Certified Cloud Practitioner**, Nov 2022

Awards: 1st Place, Cornell Data Science Hackathon; 1st Place, Heroes vs Hackers; Best Website Hack, Columbia Health Hacks
